State Definitions

Started- A new transaction has been opened, but no order information has been entered yet.

Order entered- The customer's items have been recorded, so the order total can be calculated.

Rewards account identified- The customer's loyalty account has been entered and linked to the order.

Rewards processing- The system is checking the customer's rewards to decide whether the requested reward can be applied.

Awaiting approval- The transaction is paused because the reward is an exception, and an employee needs to review and approve it before it can move forward.

Rejected- The requested reward was invalid, so the transaction ends without the reward being applied.

Payment processing- The reward (if any) has been applied and the final amount is being charged to the customer.

Completed- Payment was successful and the transaction is finished.

Failed- The transaction could not finish because of a technical or payment error.
